

Richard P. Ellenberger, AIF®
Senior Associate Wealth Advisor
richard.ellenberger@domaniwealth.com

It makes a positive difference.

One of Richard Ellenberger's favorite things about his role advising clients is hearing feedback on how Domani Wealth's guidance has positively affected their lives.

"It's easier to enjoy retirement and have less stress if you know someone else is taking care of the planning and management," he says.

Richard works hand-in-hand with our firm's Senior Wealth Advisors to help individuals and families reach their financial goals. He's been pursuing his passion of finance and investing for a long time – his dad helped him set up an investment account when he was 13 so he could begin investing his earnings from his paper route.

He works with clients on everything from retirement plans to income tax strategies, and helps to manage investments, estate plans, business succession planning, and insurance coordination. He works with other team members to develop financial plans for clients as well as implement them.

The Domani Wealth core value that most resonates with him is teamwork, he says. "I enjoy the camaraderie of working with colleagues from across the firm and sharing in each other's successes."

Richard focuses on evaluating a client's financial situation, as well as actively reviewing their investment needs and coordinating portfolio implementation. A great workday for him would include meeting with clients, collaborating with team members, and then spending time with a client or prospect on the golf course.

Working in the firm's Hanover office, Richard says he likes the culture and small-town feel of southern York County. Clients stop in often to our unique office space in the historic Young Mansion.
